Scanner Profile
Defines a connection to a capture device, and settings which control how the device operates.
Remarks
Scanner Profiles are typically created and edited using the Scan Control - a component of the Scan Control used by the Scan activity. To create, edit, and test Scanner Profiles from Grooper Design Studio, go to any Batch Process Step which is configured for the Scan activity, and select the Attended Activity Tester tab.

Import Source
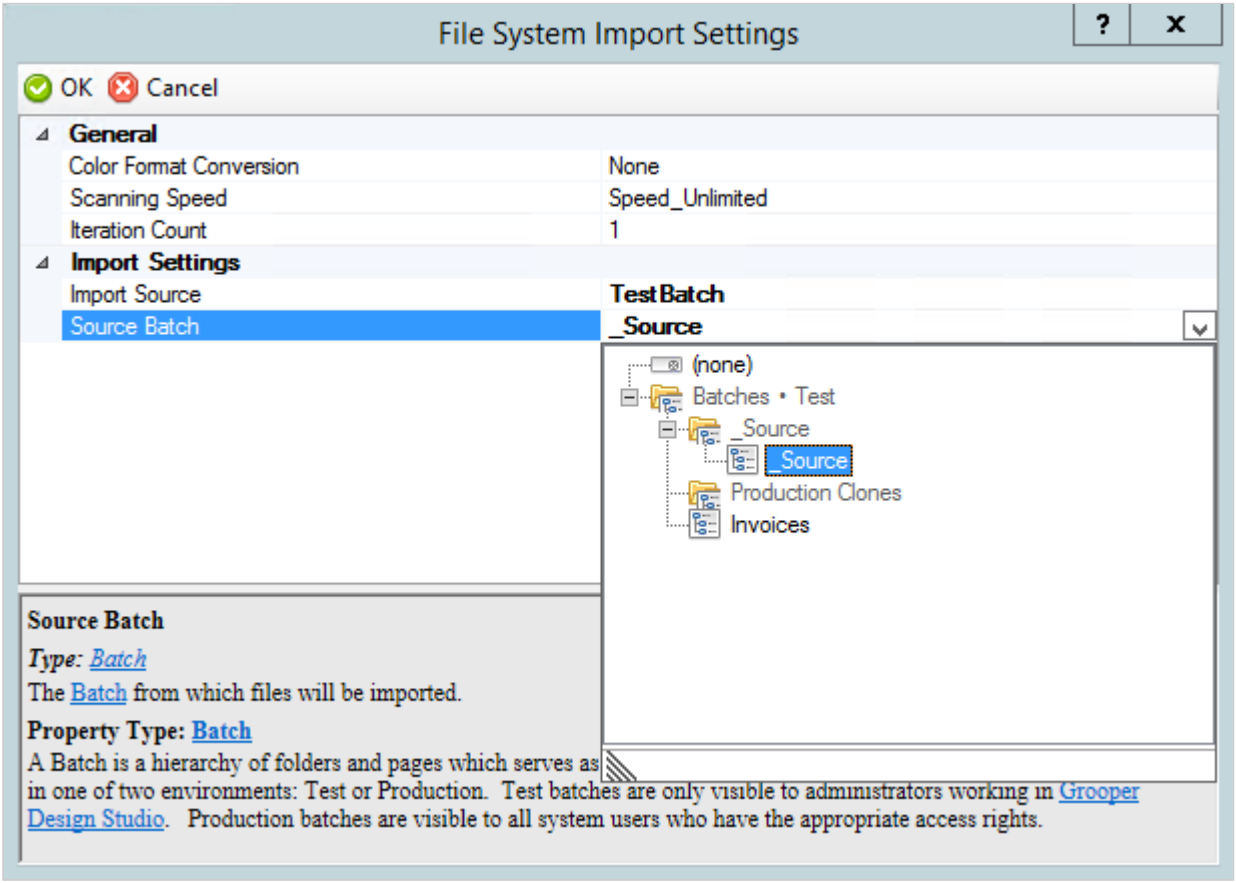
Type: ImportType, Default: FileSystem
The source from which files will be imported. Can be one of the following values:
FileSystem - Simulate a scanner by importing files from a directory.
TestBatch - Simulate a scanner by importing files from a test Batch.



Testing the Scanner Profile

> Global Resources > **Scanner Profiles**

1. From the Scanner Profile dropdown select the Invoices Source Scan profile.
2. From the batch dropdown select the Invoices batch.
3. Press Scan.
